## PRODUCT DESCRIPTION

Aydin Displays model AIGPC-156T is a 15.6" All-In-One Industrial Smart Display designed to support your demanding operator interface and HMI / SCADA application requirements.

The AIGPC-156T Industrial Smart Display comes equipped with a Projected Capacitive (PCAP) Touchscreen and an impact resistant screen (IK07 rating) with an Anti-Scratch resistant surface, the same technology found in smart phones and tablets but equipped for your industrial application.

The versatile Industrial AIGPC-156T model features a powerful AMD Ryzen processor, 8GB of Memory and equipped with a dedicated Nvidia GTX 1050Ti graphics card. The AIGPC-156T supports Full HD 1080p Resolution and supports Windows 10 IoT operating system.

The AIGPC-156T also features an IP65 rated environmentally sealed front panel for applications where dirt, dust, moisture and water are present.

The AIGPC-156T adds to Aydin Displays' [comprehensive product line](#) that comes in a variety of sizes ranging from 10" to 65". Aydin Displays has been designing and supplying ruggedized displays, smart displays / thin client displays and computer workstations for military programs for more than 50 years.
