PRODUCT DESCRIPTION

The KMGBL-15T is a 15" Sunlight Readable Display Glass Bridge Display. This Marine LED Glass Bridge unit boasts a picture that is crystal clear, brightness up to 1,500 Nits and comes standard with a PCAP Touchscreen, all at an affordable price.

The KMGBL-15T's slim profile and lightweight case is constructed of milled billet aluminum, which allows for flexible panel or bracket mount options. Certified to IEC 60945 standards, the USB multi-touch display is ideal for navigation systems and accepts HDMI, DVI-D, VGA and Composite inputs. Other notable features include a wide dimming range, an IP65 sealed front panel to protect from dust and water and front mount controls.

This display is a part of the KMGBL Series and comes in a variety of sizes such as 12", 17" 19" 24". With all of those size options, you are sure to find the correct fit for your particular application.

The [Aydin Displays Marine product line](#) comes in a variety of sizes ranging from 12" to 26". Our industrial-grade marine offerings are built to navigate and thrive through severe conditions.
